Enforced (closed loop)
forced move u
Firm A
observes p_A (mask here)
Firm B
$p_B = f(p_A$ history)
p_A
p_B
Market
(logit demand)
own sales
Deviation is seen and answered;
raises and hiding p_A identify f.
Spurious (open loop)
prompt cue (WTP)
p^*
forced move u
Firm A
observes p_A, gain ≈ 0
Firm B
$p_B \approx p^*$
p_A
p_B
Market
(logit demand)
own sales
High price is a held set point;
one forced cut moves it for good.
